

# Leave a little room for the air

**When you gas up, don't top off the tank. It's safer and helps keep the air clean.**

When you're at the pump filling up, chances are you already avoid topping off for reasons of your own—like the fact that spilling gas can be a smelly, not to mention hazardous, situation. Topping off releases harmful gas vapors into the air and cancels the benefits of anti-pollution devices on the pump. That means stopping short of a full tank is safer and it reduces pollution. So keep it up because—

*It all adds up to cleaner air*

# There's more riding on your tires than you thought.

## Properly inflated tires can save money, gas and the air

It's just a simple little thing but it can mean a lot. Keeping your vehicle's tires inflated to the maximum recommended pressure can save you money by increasing your gas mileage. It can also reduce traffic congestion due to flats caused by uneven tread wear. And, proper inflation can reduce pollution by improving the operating efficiency of your engine. So keep it up because—

*It all adds up to cleaner air*

# Your mom always told you to take good care of your stuff

**Right as usual.** Regular maintenance keeps your car running smooth and keeps the air clean.

Your mom's advice still holds true today, especially when it comes to your car. Regular tune-ups, changing the oil and checking tire inflation can improve gas mileage, extend your car's life and increase its resale value. Plus, regular maintenance can reduce traffic congestion due to preventable breakdowns and could help reduce your car's emissions by more than half. So keep it up because—

*It all adds up to cleaner air*

Every 3 months,  
every 3,000 miles  
or every  
1.3 million breaths

**Changing your oil and regular maintenance mean a cleaner running engine.**

It's true. Regular oil changes, tune-ups and maintenance can help improve your vehicle's performance and gas mileage, extend its life and increase its resale value. It can also help reduce traffic congestion due to preventable breakdowns. But possibly most important of all, taking good care of your car could help reduce emissions by more than half. And that should make you breathe a lot easier between oil changes. So keep it up because—

*It all adds up to cleaner air*
